## 12. SCHOLARSHIPS

For ease of use, these newsletters are organized by different categories, such as Academic Programs, Business Internships & Jobs, STEM Opportunities, Community Service, and so on.

As we move into 2023, students and parents should take note that more & more summer programs are now posting their applications online. Whatever one's area of interest or preferred type of activity, please start scanning the categories below and start applying!

And, in considering what activities to do, here is a helpful quote from a college admissions director:

*“Students should spend their high school years participating in organizations and activities that bring them joy. It always saddens me when a student or parent asks which clubs or organizations they should join to increase their chances of admission*

*to college. Living one's life simply to please others is never a good strategy for happiness and personal fulfillment. By exploring genuine, authentic interests as you move through high school, you'll learn a lot about yourself and will be best able to showcase your talents to colleges when the time comes.”*

—Grant Gosselin, Director of Undergraduate Admission, Boston College

In this week's **STEM** section, there are numerous excellent new options.

**Rockefeller University's Data for the People** virtual initiative welcomes all students to join their weekly sessions about the use of new data science techniques to understand human disease. The application deadline is **January 18<sup>th</sup>**!

The **Cornell Catalyst Academy** is a one-week summer introduction to Engineering/STEM subjects for current 10<sup>th</sup> and 11<sup>th</sup> graders, with a focus on under-represented/low-income/female students, though all may apply.

The **International Summer School for Young Physicists** for juniors & seniors is a low-cost chance to learn virtually about advanced topics in physics and math.

The **International Young Researchers' Conference at Columbia Medical School** is a virtual introduction to summer research in medicine and neurology and is open to all students.

And the free **NYU Arise Summer STEM Program** (for current 10<sup>th</sup> and 11<sup>th</sup> graders), along with the **Columbia SHAPE Engineering Program** (which is open to all grades and may offer financial aid to eligible students), have been popular among Stuy students.

Questions, suggestions, and information about other opportunities are always welcome and appreciated, and may be sent to Internship/Opportunity Coordinator Harvey Blumm at: [hblumm@stuy.edu](mailto:hblumm@stuy.edu) - we will share your helpful information with the Stuy community!

And, as always, students and parents should feel free to contact Harvey Blumm for advice & assistance.

### **Events of Interest to Students:**

#### ***Event Today:***

#### ***New:* Girls Write Now Friday Night Salons - Fill Your Sugar Jar & Nurture Your Creativity with Yasmine Cheyenne**

“New year...new you? If you’re looking for opportunities to heal and grow in 2023, look no further! Join us for an evening of self-care as we celebrate the release of Yasmine Cheyenne’s incredible new book, *The Sugar Jar*. This event will help participants learn about how our internal beliefs and the feedback of others can get in the way of our forward momentum with writing. We’ll learn how to deal with feedback, be compassionately honest with ourselves, and how to keep going anyway.”

## Inspiring Girls\* Summer Expeditions

“Inspiring Girls\* Expeditions is a tuition-FREE, 12-day wilderness science education program for 16-18-year-old high school cisgender girls and transgender, agender, Two Spirit, nonbinary, intersex, and genderqueer youth. All interested students are encouraged to apply, even (especially) if they don’t feel like they fit the “typical” image of a scientist or outdoors person. The students we most want to connect with often believe they are not qualified enough for our program, but we know from years of experience that the support of a trusted adult (like a mentor or teacher) can make all the difference in a student finding the confidence to apply.

The aim of this program is to provide each participant with a unique opportunity to move beyond their comfort zone through field-based science research projects, wilderness exploration, and nature-based art. We do not consider a student’s grades in our selection process; we just want to connect with participants ready to explore their own curiosity, creativity, and courage. In the summer of 2023 (Covid permitting), supportive, experienced, and knowledgeable guides and scientists will lead participants in mountaineering, kayaking or packrafting in Alaska, or rock climbing in Colorado. Please note that travel outside of the USA is not required to participate in this program.”

**Eligible:** Students 16 – 18 years old

Whichever extra-curricular program, internship, or community service activity a student may participate in, they should be sure to ask their supervisor/coordinator to write a letter of appreciation before it concludes – it is sometimes very difficult to obtain this later on. And the more personal & detailed the letter, the better. A copy should then be submitted to your counselor.
